

Job Title: Digital and Robotics Fabrication Specialist

Welcome to Mirmil Products!

What We're Looking For: The Digital and Robotics Fabrication Specialist is responsible for the successful tool path generating in a large-scale format (LFAM).

Responsibilities of the Role:

- Conduct robotic programming activities through to project completion
- Create, monitor and maintain a well kept, organized and safe work environment
- Program, test and debug robots and control systems
- Collaborate and coordinate between departments for job completion
- Investigate mechanical failures or unexpected maintenance problems
- Document, monitor and communicate on project progress
- Maintain a high level of confidentiality at all times

What You Offer:

- Strong critical thinking and analytical skills
- Exceptional problem-solving skills and a keen eye for detail
- Excellent time-management and multi-tasking skills
- Demonstrated ability to work both independently and as part of a team
- Enthusiasm and willingness to learn new software
- Fluidity to work with projects based on the imperial system of measurement

Key Requirements (education/certifications/licences/passport/clean drivers abstract):

- Fusion, SolidWorks or a variation of CAD software experience is required
- Knowledge of various automated programs is a strong asset, including Blender, Rhino (Grasshopper) or other similar types
- 3D printing experience, or Kuka (Robotics) experience is beneficial
- Knowledge of LFAM

Wage / Schedule:

- From \$22.00 / hour based on skills and experience
- Monday – Friday, 7:30am – 4:30pm with overtime

We look forward to meeting you!
